

No Elevator Service to MU East Tower and West Tower Starting April 19

The elevators serving the MU West Tower and the MU East Tower are scheduled to close for modernization on April 19. Construction is scheduled to continue through September 2021.

During construction, there will be no elevator serving the West Tower or the East Tower.

Access will be via stairs only. Keys to the stairways from the exterior ground level doors have been issued to those who need regular access. Access from the stairway onto each floor will not change – for example, if the door to the floor is now card-key only it will remain card-key only.

If you have questions or concerns about accessing space in the West or East Tower please contact your department manager.

A phone number has been established that will be available during construction to connect callers to contacts from the units housed in the West and East Towers. The phone number is posted at ground floor entrances and near the elevators under construction.

We understand this shutdown is a significant inconvenience. We appreciate your patience as we work to complete this important infrastructure project to modernize the elevators in the MU.

Questions about this project should be directed to UCSF Real Estate Project Manager Jeff Costan at 415.377.6737.
